Did you go to Anti-Nuclear March  
on Nov. 11 in Chicago?

7 December 1981

Dear Ralph:

How about sharing a room in L.A.? It certainly would cut expenses. I wouldn't even mind having Michael in the room, provided he promises not to throw bourbon on me. Let me know what you decide.

Connie and I have a question about the "PARTS" element of the fixed fields. How do you interpret the following? Could you give examples of each?

- ~~a~~-no parts exist
- a-parts exist
- u-unknown
- n-not applicable

For edition cataloged

NOT PRINTED music  
(e.g. Song recording)

Feel free to scribble on this page and send it back.

Connie and I were also wondering if we could possibly sit in on a few sessions of the MOUG meeting in L.A. I told Connie that I have friends in high places who might be able to get us in. We are particularly interested in the provisions OCLC is making for indexing the 028. The folks here are working on a program that would print a series of notes from multiple 028's, as well as offer index access.

Please pass on my greetings to David, Kathy, Michael, Sue, et al.

All the best,

Dick

Also,

"PARTS" does not apply to solo music,

e.g. piano music - code "n" (?)

in Form of score - code "z" (?)

Best thing to do is to check with Catherine Barland at LC to see what they are going to do.

THINGS ARE EITHER KNOWN OR UNKNOWN (THIS IS AN EPITOMOLOGICAL PROBLEM)
